Clarification/Ammendment/Changes about/in the specification addressed after the Pre-Bid meeting for goAML hardware procurement held on 2072/10/28.

Device	Required Specification	Query/Suggestion	Response
SAN	Cache: Min 8GB Battery Backed cache per controller	Current trend is 16GB Cache, changing 8GB to 16GB later on will be costlier than to get 16GB instead of 8GB now.	The minimum requirement has been changed to : MIN 16GB Battery backed cache per controller.
Layer 2 Switch		Better to add feature for loop prevention and detection.	Feature: Loop Prevention and Detection.
Layer 3 Switch	Architecture: Should have 4x1G uplinks	Can it be changed to 1x10G uplinks	No Change in specification of the line item as per our requirement.
Internal Firewall	Network Connectivity: Should support 1024 VLANs.	Can it be changed to 1024 VLANs.	No Change in specification of the line item as per our requirement.
	Power supply: Dual Internal Redundant.	Can it be changed to Stand alone?	No Change in specification of the line item as per our requirement.
	Performance: Should have 3.5Gbps of IPS throughput	Can it be changed to 3.0Gbps of IPS throughput?	The minimum requirement has been changed to: Should have 3.0Gbps of IPS throughput.
External Firewall		License requirement should be made clear.	License Requirement: License subscription of atleast 3 years for all the requirements.
	Warranty: 3 Years parts and labor on all parts	Better to change to OEM Warranty	Warranty may be proposed as per vendor's policy.
	Network Connectivity: Should support 1024 VLANs.	Can it be changed to 1024 VLANs.	No Change in specification of the line item as per our requirement.
